

## Problem description and Introduction

The basis of this study is to help a small group of investors planning to open their first Indian restaurant expansion in London. Being that London is the most populated city in England, and continually ranks as an important global city based on a high quality of living, the choice to expand into the neighbor of the north market was an easy selection for the investing group. However, with limited knowledge of the London market, the group of investors have selected us to assist in the selection of which areas of London will facilitate a launch of their brewery / restaurant expansion.

They are interested in building in an area that meets the following criteria:

1. A neighborhood with an average to above average total population
2. above average populations of 25–40-year-old male and female professionals
3. A high concentration of the population having secondary education
4. Average to above average median net household incomes

With these criteria given by the investing group, based on previous success in other markets, the objective is to locate and recommend to the investors, the target audience, which neighborhood(s) of London will be the best choice to start their international growth plan. The information gained will assist in choosing the right location by providing data about the population of each neighborhood, in addition to other established venues present in these areas.

Additionally, this information could be of interest to other potential investors looking to open a new restaurant or entertainment venue in London.
